DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 3, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Forster.

Forster in Figs. 1-15 discloses stationary first member 102, movable second member 104, electrical contact 134, permanent magnet 404, means for generating an electromagnetic force 106, additional manual switch means 155, and spring means 206. The operation of the device is described in Col 6, lines 27-59. Concerning the rejection of Claim 3, language that suggests or makes optional but does not limit a claim to a particular structure, i.e., “adapted to”, does not limit the scope of a claim or claim limitation.

Allowable Subject Matter

3. Claims 4 and 6-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter: Forster, the closest prior art of record, failed to disclose or teach permanent

magnet means provided on the movable member nor a pair of U-shaped magnetic yokes.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Both Kralik and Kellogg, et al., disclose contactors with permanent magnet latching means.
